

K-Series Speed Converter (05-06 to 02-04)

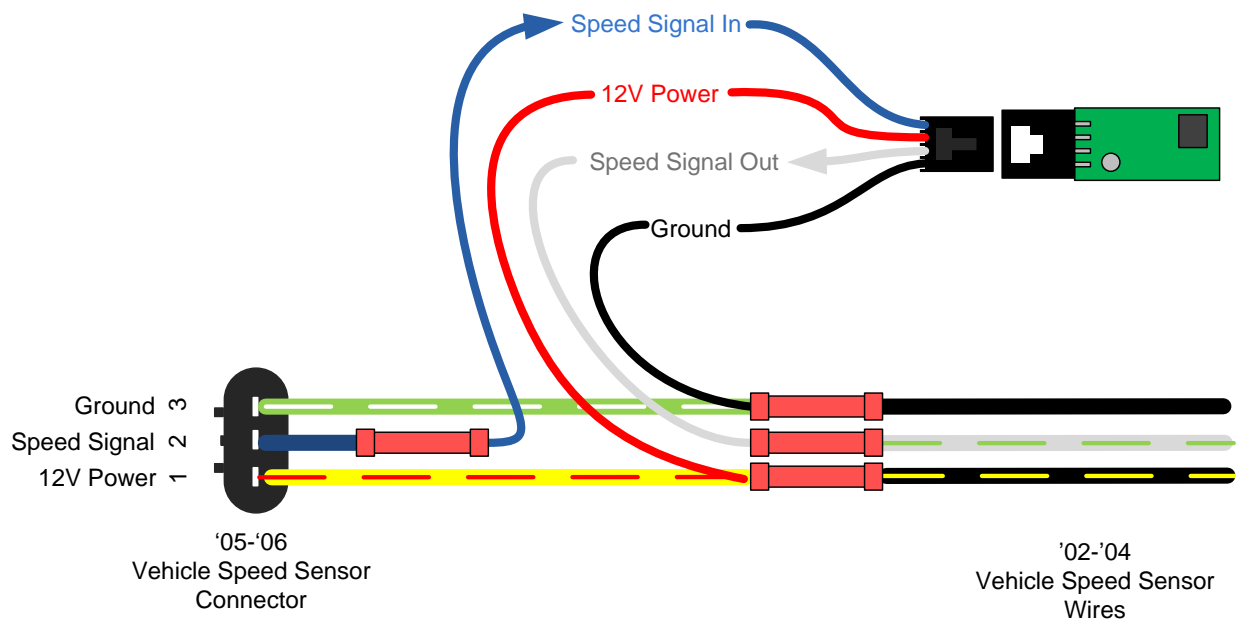

Information

Congratulations on purchasing the Hybrid Racing Vehicle Speed Converter. This converter was designed specifically to convert the Vehicle Speed Signal from a 05-06 K-series transmission, to the signal found on 02-04 K-series transmissions. For K-swapped cars, this will allow for a fully functional speedometer and VTEC engagement.

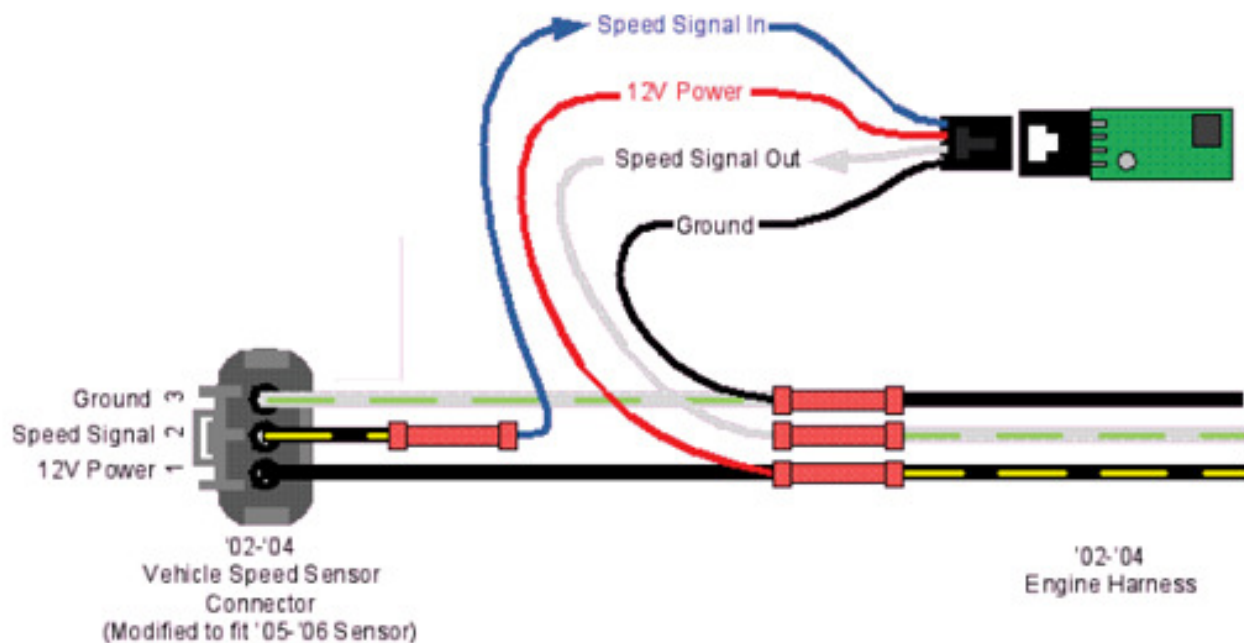

Calibration

Because this converter was designed specifically for this application, no calibration is necessary.
